

Question Paper: Ai

****Artificial Intelligence Question Paper****

=====

****Instructions:****

- * The question paper consists of three sections: Multiple Choice Questions, Short Questions, and Long/Descriptive Questions.
- * Attempt all questions in the given time frame.
- * Use a blue or black pen to write your answers.

****Section A: Multiple Choice Questions (30 marks)****

1. What does AI stand for?

- A) Artificial Instinct
- B) Artificial Intelligence
- C) Advanced Innovation
- D) Automated Interface

2. Which of the following is an application of AI?

- A) Web Development
- B) Data Analysis
- C) Virtual Assistance
- D) All of the above

Question Paper: Ai

3. What is the term for machines that can think and learn like humans?

- A) Robotics
- B) Machine Learning
- C) Natural Language Processing
- D) Artificial Intelligence

4. Who is considered the father of Artificial Intelligence?

- A) Alan Turing
- B) John McCarthy
- C) Marvin Minsky
- D) Frank Rosenblatt

5. What is the primary goal of AI research?

- A) To create machines that can perform tasks autonomously
- B) To develop machines that can think and learn like humans
- C) To design machines that can interact with humans
- D) To build machines that can replace human workers

6. Which AI technique is used for image recognition?

- A) Natural Language Processing
- B) Machine Learning
- C) Deep Learning
- D) Computer Vision

Question Paper: Ai

7. What is the term for AI systems that can learn from data without being explicitly programmed?

- A) Machine Learning
- B) Deep Learning
- C) Neural Networks
- D) Cognitive Computing

8. What is the primary challenge in developing AI systems?

- A) Data Quality
- B) Computational Power
- C) Algorithmic Complexity
- D) All of the above

9. Which of the following is a type of AI?

- A) Narrow or Weak AI
- B) General or Strong AI
- C) Superintelligence
- D) All of the above

10. What is the term for the study of AI's impact on society?

- A) AI Ethics
- B) AI Safety
- C) AI Governance
- D) AI Policy

Question Paper: Ai

****Section B: Short Questions (25 marks)****

1. What are the key differences between narrow and general AI? (4 marks)
2. Describe the process of machine learning. (3 marks)
3. What are the applications of natural language processing in AI? (4 marks)
4. Explain the concept of neural networks in AI. (4 marks)
5. What are the benefits and limitations of using AI in decision-making? (5 marks)

****Section C: Long/Descriptive Questions (30 marks)****

1. Discuss the role of AI in modern healthcare systems. How can AI be used to improve patient outcomes and reduce healthcare costs? (10 marks)
2. Describe the concept of deep learning and its applications in AI. How does deep learning differ from traditional machine learning techniques? (8 marks)
3. What are the potential risks and challenges associated with the development of superintelligent AI systems? How can these risks be mitigated? (10 marks)

****Answer Key:****

****Section A: Multiple Choice Questions****

Question Paper: Ai

1. B) Artificial Intelligence
2. D) All of the above
3. D) Artificial Intelligence
4. B) John McCarthy
5. B) To develop machines that can think and learn like humans
6. C) Deep Learning
7. A) Machine Learning
8. D) All of the above
9. D) All of the above
10. A) AI Ethics

****Section B: Short Questions****

(Answers will vary depending on the student's response)

****Section C: Long/Descriptive Questions****

(Answers will vary depending on the student's response)
